

Please read the instructions below to connect your phone and Jayster™ keychain.

Connect to your Jayster™ device:

1. Download the Jayster™ app and open it*.
2. Push "scan" - allow up to 10 seconds for your phone to search for your Jayster™. You will see your device's unique ID (key + four digits) in the spin wheel. If unsuccessful, please scan again**.
3. Push "connect" when it turns green.

Enjoy four app functions (only available when connected):

1. Alarm mode: Send an alarm
2. Find mode: Indicates how close or far you are from your Jayster™ device
3. Nest mode: Turn on to attach your phone and your Jayster™ device. If the two separate beyond approximately 15 feet an alarm will sound on both devices.
Note: To prevent false alarms, turn on the nest feature when your phone and keys are within 6 inches.
4. Map mode: Turn on map mode and your phone's GPS will start tracking your Jayster™ device. The Jayster™ app will automatically store the GPS location where the Jayster™ device was last seen.

I lost my keys, now what?

- Open the Jayster™ app, scan and connect. Once connected, use the alarm or find feature to help find missing keys.

For more information visit findjayster.com or email support@blueringtechnologies.com

**Search the app store for "Jayster"*

***If you receive an error message please repeat step 2 up to three times. If you still get an error message, it is likely your Jayster™ device is more than 50 ft. away or has a low battery.*

CAUTION: Choking hazard. May contain small parts. Not for children.
